

## Phase 7:Project Documentation

### SmartLenderAI-Powered Credit Card Approval System

| Role             | Name                   |
|------------------|------------------------|
| <b>Team Lead</b> | Shaik Mohmmad Samiulla |
| <b>Member 1</b>  | Mangali Rama Keerthana |
| <b>Member 2</b>  | Bandaru Koushik        |
| <b>Member 3</b>  | Mangali Venkatesh      |
| <b>Member 4</b>  | K Sai Lakshmi Pawani   |

### Repository Structure

- Dataset/ - raw applicant data
- Flask/ - web application and trained model artifacts
- Project Documentation/ - phase-wise project reports
- Training/ - model training notebook

### How to Run Locally

1. Install dependencies with `pip install -r requirements.txt`
2. Place the dataset CSV in the Dataset/ folder
3. Run all cells in the training notebook to generate the model files
4. From the Flask/ folder, run `python app.py`
5. Open the local address shown in the terminal to use the form
